RATES FOR SEED

SEPARATING TOBACCO SEED—A minimum charge up to 4 ounces, 35 cents.

Over 4 ounces and up to 8 ounces, 45 cents.

Over that and up to one pound, 75 cents.

Add the return postage to above rates.

INSTRUCTIONS

Put your seed in a paper bag and enclose that in a muslin bag, put your name and address with it—send your remittance in a separate letter. Send your seed as early as possible (January and February). We are too busy during March to separate seed.

We have a full equipped laboratory and separate to a standard weight. Twenty-five years experience enables us to give you perfect service.

WEAVER'S TOBACCO SEED

We grow most of the varieties and types called for in Pennsylvania, Ohio and Wisconsin.

WEAVER'S HYBRID BROAD LEAF—(the leading broad leaf) Three other names are now used for types of broad leaf that was originally taken from Weaver's Broad Leaf.

WEAVER'S EARLY PENNSYLVANIA NARROW LEAF—No better known and has given universal satisfaction for over twenty years.

GLESSNER—The original strain.

New Hybrid Narrow Leaf type not fixed yet.

HAVANA and SLAUGHTER and the three types that were originally taken from Weaver's Broad Leaf. All seed packed in ½ ounce pks. Extra select grade separated to standard weight, price 50c. Number one grade, 25c per ½ ounce.

The 25c pks. are recleaned, but not separated to our high standard weight.

Weaver's

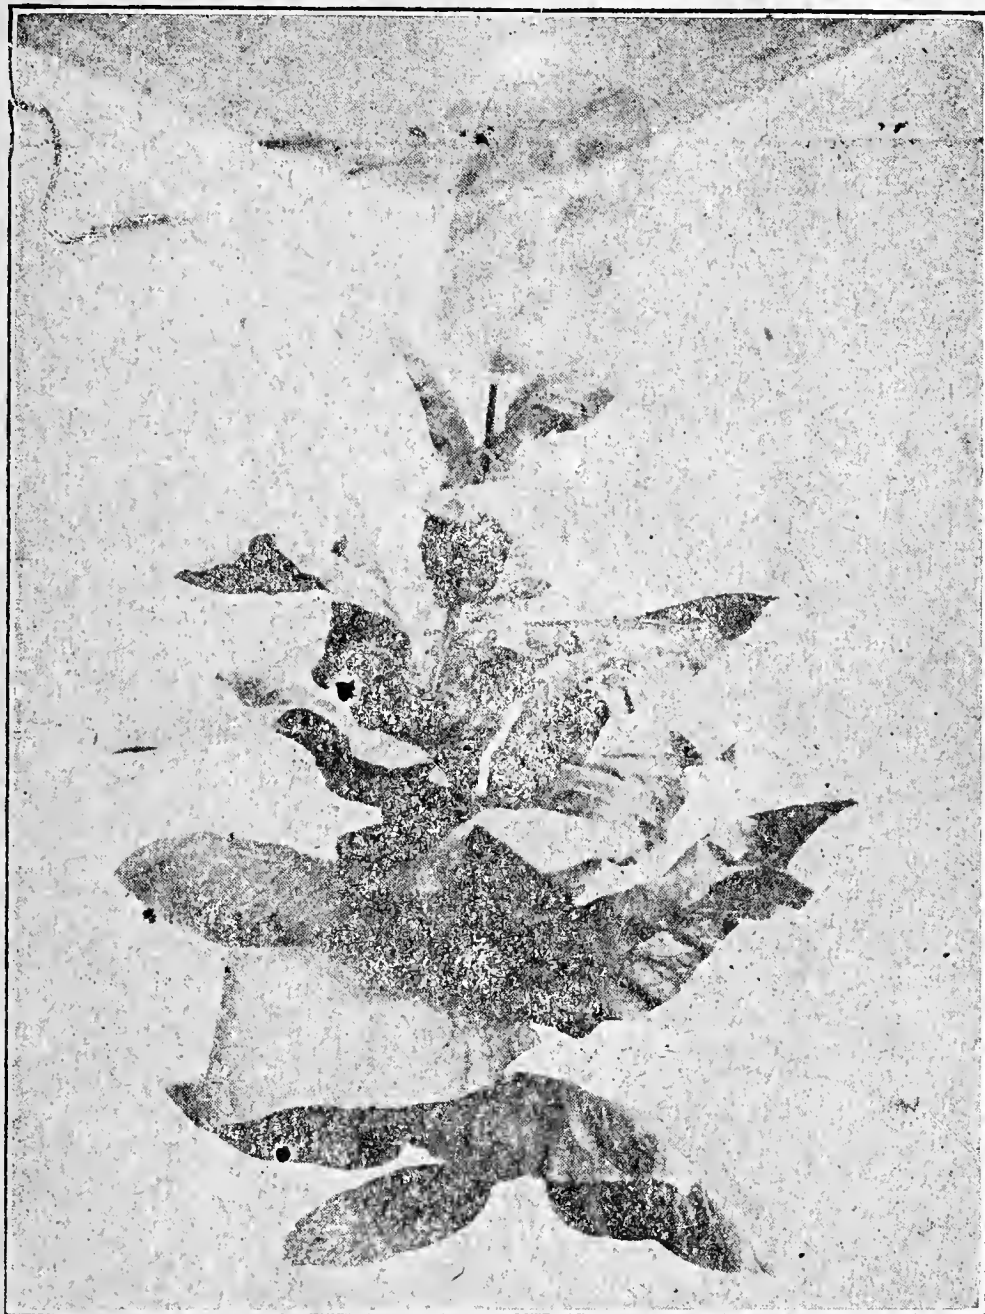

HEAVY LODIED HYBRID BROAD LEAF TOBACCO

Crown Under the New System of Seed Propagation

Do not cut your tobacco unripe-leave it mature and ripen. Plant 3 1-2 feet by 30 inches. Plant early in May as possible

This Packet contains one-half ounce of Seed from Selected Plants.

PRICE 50 CENTS

DIRECTION-Take one tablespoonfull of sprouted seed to a two gallon can of water keep stirring all the time. This is sufficient to sow 150 square feet. This seed was grown under scientific and improved methods. Just before the plant blooms. A transparent paraffine paper bag is placed over to prevent Cross Pollenization--TOBACCO BEING SELF FERTILE PLANT, when bagged, insures a stronger seed and insures a more uniform type. Careful selection has been adhered to. Plants that do not score to a certain standard are rejected each seed capsule is separately examined, the light and medium seed is blown out by a TOBACCO SEED SEPARATOR. leaving only the largest and strongest seed. This seed will germinate very quickly and plants will be ready for transplanting in from one week to ten days earlier than with open grown unseparated seed.
